

Worlds 1st Plug & Go Internet Phone Launched

Group 3 Technology (G3T), an established Midlands-based VoIP software development company, are launching the worlds 1st Plug & Go Broadband Internet Phone for international business and residential users, enabling FREE calls over the Internet and low-cost calls to landlines and mobiles.

The service uses a new technology developed in the UK. Each Phone has a unique built-in UK Telephone Number that is retained wherever in the world the phone is connected to the internet. This means that it can receive calls from any Landline or Mobile in the world, and be used to make very low cost calls to any worldwide Landline/mobile (OFFnet).

Simple, Plug & Go setup with Free Phone Calls to Landlines in 21 International Destinations ...

Customers can choose either a Non-Geographic number (e.g. 0870) or a Geographic UK Telephone number (e.g. 0207, 0121 ...) which will be assigned to their Internet Phone, and can be purchased for a one-off price of £65 or £80 respectively. A Pay As You Go system is used for adding credits to the Phone for OFFnet calls, with free online access to statements. Calls to Landlines in the UK, USA, Canada and 18 other destinations around the world are Free.

"I use Free Minutes on my UK Mobile to call an E-Phone in Australia ... For FREE ... Fantastic!"

How Much would you spend on a 60 minute phone call to Australia or Canada?

With E-Phone you can call 21 destinations for FREE...

Pre-Order Now @ www.ephone.UK.net

The Broadband Internet Phone can also work behind a network at home or at the office, and there is a spare port in the phone to connect your PC if you need to share a single connection. G3T has a Wi-Fi adaptor available for the Phone to provide flexibility in its location within your home or office.

There is also an IP/Phone Dual adaptor which will enable your existing phone line and standard home phone to be connected and also used as your broadband internet phone, effectively giving you two UK telephone numbers! There is also a spare port on this adaptor for you to connect your PC.
