

Connect your ePhone to the Internet

**Method 1: Connecting Directly via Router/Network Socket**

- i. Plug network cable provided into your router/network socket and the other end into uplink data port on the back of the phone
- ii. Connect Power to ePhone and switch to "ON"
- iii. Set-up complete when ePhone display shows "Ready For Calls"

**Method 2: Connecting by sharing network connection with PC**

- i. Unplug the Internet cable from the computer and plug into uplink data port on the ePhone
- ii. Using the network cable provided plug one end into the PC data port on the phone and the other into the data port on the computer
- iii. Connect Power to ePhone and switch to "ON"
- iv. Set-up complete when ePhone display shows "Ready For Calls"

**Now MAKE and RECEIVE Internet calls and RECEIVE calls from Landlines/mobiles - FREE**

**But you will need to Activate your On-line Top-up Account to MAKE calls to Landlines/mobiles. {See Welcome Letter or website for Instructions}**

### 3. Making a FREE Internet call

- i. Simply dial full telephone number including area code (followed by # button for immediate dialling).

### 4. Making an OFFnet call to landlines and mobiles

- i. Credit on your online top up account is required. Simply dial the full telephone number including area code

### 5.1 Using the phone book through Internet Browser

- i. Obtain IP address of the phone by pressing the Local IP button on the ePhone.
- ii. Using Internet Explorer, enter the IP number in the address bar and press enter
- iii. Access the ePhone by entering the default password **1234**
- iv. Click on to the phone book and follow the online instructions

### 5.2 Using the phone book from ePhone Handset

- i. Press the Menu button. Scroll to "2.Phone Book" and follow the on-screen instructions

### 6. Using speakerphone

- i. Press the hands free button and dial the number as normal
