

Setup Guide

[1. Connect your E-Phone to the Internet](#)

Method 1- Connecting Directly via Router/Network Socket

- i. Plug network cable provided into your router/network socket and the other end into *either* data port on the back of the phone
- ii. Connect to Power supply
- iii. Phone will display 'G3T e2e Phone' when ready

Method 2-Connecting by sharing network connection with PC

- i. Unplug the Internet cable from the computer and plug into *either* data port on the E-Phone
- ii. Using the network cable provided plug one end into the data port on the phone and the other into the data port on the computer
- iii. Connect phone to Power supply
- iv. Phone will display 'G3T e2e Phone' when ready

Your E-Phone is now ready to make free Internet calls to other E-Phone users and to receive calls from landlines and mobiles

[2. Create your online top-up account for OFFnet Service](#)

- i. Go to www.ephone.UK.net and follow the online Instructions
